

VersaONE™

Universal SASE Platform

Create your self-protecting network

VersaONE seamlessly integrates SASE, SSE, SD-WAN, and SD-LAN to securely connect all users, devices, workloads, and networks through a unified platform. Powered by AI, VersaONE offers organizations a robust, adaptive infrastructure that supports global connectivity, reduces complexity, and enhances security.

The VersaONE difference

VersaONE incorporates Zero Trust security built-in at every edge, and utilizes AI for advanced threat detection, network optimization, and real-time response.

Universal connectivity

Securely connect all users, devices, locations, and apps across all networks

Unified platform

Single management console with unified policy and data lake built on a single-pass architecture

AI-powered

Integrated AI delivers actionable insights for advanced security and network optimization

Security built-in

Converged security and networking built on a zero trust foundation

Protect & connect apps

Securely connect users to SaaS and private apps with zero trust principles, ensuring seamless and consistent access regardless of location.

Protect & connect locations

Deliver reliable connectivity, robust data protection, and enhanced threat protection across all locations, including branch offices, campuses, remote facilities, and users.

Secure your users

Securely connect your hybrid workforce to applications and the internet, protecting against cyber threats and data leaks while optimizing their digital experience.

Secure your devices

Secure all your devices with real-time threat protection, zero trust access, and advanced device discovery.

Transform your LAN

Build a software-defined LAN that integrates zero trust and IoT security, combining switching, routing, security, and network services.

Eliminate product sprawl

Reduce the cost and complexity of point solutions with a unified platform that security connects locations, users, and devices to applications and workloads.

Create your self-protecting network with VersaONE.

About Versa

Versa, a global leader in SASE, enables organizations to create self-protecting networks that radically simplify and automate their network and security infrastructure. Powered by AI, the VersaONE Universal SASE platform delivers converged SSE, SD-WAN, and SD-LAN solutions that protect data and defend against cyberthreats while delivering a superior digital experience. Thousands of customers globally, with hundreds of thousands of sites and millions of users trust Versa with their mission critical networks and security.
